**SANJIVANI COLLEGE OF ENGINEERING, KOPARGAON, 423603**

**Tal- Kopargaon, Dist.: Ahmednagar**

**Academic Year: 2024-25**

## ACKNOWLEDGEMENT

We Would like to express our sincere gratitude to several individuals and SCOE for supporting us throughout our mini project titled “Shri.Changdev Barku Pa. Kolpe School Website”. First ,we wish to express our sincere gratitude to our respected Guide **Prof. J.N.Kale** for his enthusiasm, patience, insightful comments ,helpful information ,practical advice and unceasing idea that have helped us tremendously at all times in our project .His immense knowledge ,profound experience and professional expertise has enable us to complete this project successfully and of course our Director **Dr. A. G. Thakur** and beloved HOD **Dr. D .B. Kshirsagar** without their support and guidance ,this project would not have been possible.

**Miss. Aware Sakshi Santosh** **UCS22F1008**

**Miss. Bairagi Mansi Dnyaneshwar** **UCS22F1014**

**Miss. Borde Payal Babasaheb** **UCS22F1024**

**Miss. Chaudhari Ashwini Parameshwar** **UCS22F1026**

**(T.Y B. Tech Computer Engineering)**

## ABSTRACT

The project aims to create an integrated digital platform that connects students, teachers, and parents of **Shree. Changdev Barku Pa. Kolpe Madhyamic Vidyalaya**, providing easy access to essential information, resources, and school updates. The platform is designed to enhance communication, streamline academic processes, and foster a collaborative learning environment. By integrating various functions like assignment submissions, grade tracking, school notices, and event updates, this project seeks to ensure seamless interaction among all stakeholders, improving the overall educational experience for students and simplifying administrative tasks for teachers and parents.

# **CHAPTER 1**

## **INTRODUCTION**

### **1.1 Relevant Theory**

Effective communication and access to information play a crucial role in creating a well-connected educational ecosystem. Schools require efficient systems to enhance the collaboration between students, teachers, and parents, as this directly impacts the academic performance and overall development of students. Theories and practices related to communication, educational technology, and parental involvement form the foundation of this project.

#### **1.1.1 Communication Theory in Education**

Communication is central to the teaching and learning process. According to the Transactional Model of Communication, the interaction between sender and receiver must be seamless to minimize noise (miscommunication). In schools, communication barriers often arise due to outdated or inefficient channels, leading to delays or gaps in sharing essential information. This highlights the need for digital communication platforms that are direct, reliable, and user-friendly.

#### **1.1.2 Educational Technology**

The integration of technology in education, often referred to as EdTech, has transformed the way students, teachers, and parents interact. Platforms such as Learning Management Systems (LMS) and School Information Systems (SIS) have been widely adopted to manage administrative tasks, academic tracking, and resource sharing. The Technology Acceptance Model (TAM) states that ease of use and perceived usefulness are key factors influencing the adoption of technology. Implementing a platform that aligns with these principles can improve efficiency and engagement within the school community.

#### **1.1.4 Digital Transformation in Schools**

The shift toward digitization in schools addresses the inefficiencies of traditional methods such as notices, manual record-keeping, and in-person meetings. A unified digital platform can facilitate:

- Real-time updates on attendance, grades, and assignments.

- Streamlined administrative processes, such as sharing circulars or notifications.
- Enhanced collaboration through communication tools like messaging and discussion forums.

### **1.1.5 Benefits of Streamlined Communication**

Research shows that streamlined communication fosters a stronger school community. Some of the key benefits include:

- **Timeliness:** Real-time updates ensure no critical information is missed.
- **Accessibility:** Parents, teachers, and students can access information from any device at any time.
- **Transparency:** Academic performance and attendance records become more transparent, leading to greater accountability.
- **Efficiency:** Automation reduces the workload for teachers and administrators.

## **1.2 Problem Statement**

Connects students, teachers, and parents at Shree Changdev Barku Pa. Kolpe Madhyamic Vidyalaya with easy access to key information, resources, and school updates. At **Shree Changdev Barku Pa. Kolpe Madhyamic Vidyalay**, there is a lack of a streamlined communication platform that effectively connects students, teachers, and parents. This disconnect results in difficulties accessing key information, such as school updates, assignments, attendance records, and other important resources. The current communication methods, such as notices, phone calls, and in-person meetings, are inefficient, time-consuming, and often lead to information gaps.

## **1.3 Objectives**

**Enhance Communication:** Establish a direct, user-friendly communication channel between teachers, students, and parents.

**Improve Academic Monitoring:** Allow students and parents to track academic progress, assignments, and other scholastic activities.

**Simplify Administrative Processes:** Reduce paperwork and manual processes for teachers and school administration by automating information sharing.

**Increase Parental Engagement:** Involve parents more actively in the educational journey of their children by providing them with tools to monitor their child's academic life.

## **1.4 Scope**

**Communication Tools:** Messaging system for students, teachers, and parents to facilitate real-time communication.

**Academic Resources:** Access to study materials, homework assignments, and exam schedules.

**School Updates:** Posting of important announcements, events, and notifications related to school activities.

**Progress Tracking:** A feature for students and parents to track academic performance, including grades, attendance, and feedback from teachers.

**Parental Involvement:** Tools that allow parents to monitor their child's progress, communicate with teachers, and receive timely updates on school activities.

## CHAPTER 2

### REQUIREMENT ANALYSIS

#### 2.1 Functional Requirement's

➤ **Homepage:**

- The homepage should display a welcoming and informative layout.
- Easy access to school announcements, news, and highlights.
- Should be navigable for all users (students, teachers, parents, administrators).

➤ **Student Portal:**

- **Access to homework and assignments:** Students should be able to view and submit assignments online.
- **Access to exam timetables:** Students need to view schedules for exams and other academic events.
- **School notices:** Students should be able to view any important updates or notices from teachers and administrators.
- **Study resources:** Access to educational materials such as study guides, past papers, and learning resources.

➤ **Teacher Portal:**

- **Post assignments:** Teachers should be able to upload assignments and communicate deadlines.
- **Manage student progress:** Teachers should have the ability to monitor and update student performance and grades.
- **Communication with parents:** Teachers should be able to message or notify parents about their child's academic performance, behavior, etc.
- **Manage class schedules and events:** Teachers need a way to access and update their class timetables.

➤ **Parent Portal:**

- **View student attendance:** Parents should be able to access and track their child's attendance records.
- **Access academic reports:** Parents should be able to see detailed reports of their child's academic performance.
- **School event updates:** Parents should be informed of school events, meetings, and other important happenings.
- **Communication with teachers:** Parents should have a way to contact teachers directly or schedule meetings.

➤ **Event Calendar and Notice Board:**

- An integrated **calendar** for school events (e.g., parent-teacher meetings, holidays, etc.).
- A **notice board** to post announcements, updates, and important deadlines.

➤ **Online Forms:**

- **Forms for admissions:** The website should facilitate online submission of admission forms and other administrative forms.
- **Feedback forms:** Parents and students should be able to submit feedback on the school or specific events.

## 2.2 Non - Functional Requirement's

➤ **Usability:**

- **User-friendly design:** The website should be intuitive and easy to navigate for all users (students, parents, teachers, administrators).
- **Mobile-friendly:** The website should be accessible from mobile devices, ensuring a good experience for users who access it on smartphones or tablets.
- **Accessibility:** The website must meet web accessibility standards (e.g., WCAG) to ensure it is usable for people with disabilities.

➤ **Performance:**

- **Fast load times:** The website should load quickly even during peak traffic times.

- **Scalability:** The website should be able to handle an increasing number of users (students, teachers, and parents) as the school grows.
- **Security:**
  - **Data protection:** The website must ensure the security of sensitive data (student records, grades, attendance) through encryption and secure login methods.
  - **Authentication and authorization:** Different access levels for students, parents, teachers, and administrators to ensure that users only have access to the data that is relevant to them.
- **Reliability and Availability:**
  - **High availability:** The website should be available 24/7, with minimal downtime for maintenance or upgrades.
  - **Backup and recovery:** Regular backups of data should be taken, and the website should have a disaster recovery plan.
- **Compatibility:**
  - **Cross-browser compatibility:** The website must be compatible with popular web browsers (Chrome, Firefox, Edge, Safari).
  - **Cross-platform support:** The website should function well on various operating systems (Windows, macOS, Android, iOS).

## CHAPTER 3

### TOOLS AND TECHNOLOGY

#### 3.1 Features of HTML Used:

➤ **Semantic HTML5 Elements:**

Use of elements like `<header>`, `<footer>`, `<article>`, `<section>`, `<nav>`, etc., for improved readability and accessibility.

➤ **Forms and Input Elements:**

`<form>`, `<input>`, `<textarea>`, `<select>`, `<button>`, etc., for creating interactive forms for login, registration, and feedback submission.

➤ **Multimedia Tags:**

`<img>` for images and `<video>` or `<audio>` for multimedia content such as school events or announcements.

➤ **Linking and Navigation:**

`<a>` tags for internal and external navigation between pages and sections of the website.

#### 3.2 Features of CSS Used

➤ **Responsive Web Design (RWD):**

Media Queries to ensure the website adjusts its layout based on the device (mobile, tablet, desktop).

➤ **Flexbox & Grid Layouts:**

Flexbox for creating flexible layouts that adjust based on screen size (e.g., responsive forms, navigation bars).

CSS Grid for creating more complex, multi-dimensional layouts (e.g., student and teacher dashboards).

➤ **Animations & Transitions:**

CSS animations and transitions to enhance the user experience (e.g., image sliders, hover effects on buttons, text animations).

➤ **Custom Fonts and Icons:**

Integration of Google Fonts for custom typography.

Use of FontAwesome or Icon libraries for adding icons to the UI (e.g., social media icons, navigation icons).

➤ **Pseudo-Classes and Pseudo-Elements:**

CSS selectors like :hover

### 3.3 Features of JavaScript (JS) Used:

➤ **DOM Manipulation:**

Using JavaScript to interact with the HTML document, such as adding dynamic content, showing/hiding elements (e.g., event calendar), and updating the content of user dashboards.

➤ **Event Handling:**

Handling user interactions like form submissions, button clicks, and page navigation with JavaScript event listeners.

### 3.4 Features of Backend (PHP & MySQL) Used:

➤ **PHP for Server-Side Scripting:**

Server-Side Processing: Handling form submissions (e.g., admission, login, feedback) and processing data before storing it in the database.

Session Management: Using PHP sessions to manage user authentication and access control.

File Handling: Uploading and managing files like student assignments, teacher notes, and event images.

### 3.5 Database Management (MySQL):

➤ **CRUD Operations:** Creating, reading, updating, and deleting data in MySQL (e.g., adding new users, updating attendance records, deleting old events).

➤ **Relational Tables:** Using relational tables to manage students, teachers, parents, classes, assignments, etc.

- **SQL Queries:** Writing optimized queries to retrieve data efficiently (e.g., fetching all student results or upcoming events).
- **Joins:** Using SQL JOIN operations to link related data (e.g., fetching student details along with their grades).

# CHAPTER 4

## SYSTEM DESIGN

### 4.1 System Architecture

fig. 4.1 System Architecture

### 4.2 System Architecture Components

The system follows a three-tier architecture for modularity and scalability:

#### 1. Presentation Layer

- **Components:**
  - User Interface (UI) designed using HTML, CSS, JavaScript, and PHP for rendering dynamic pages.
  - Login and registration forms for all roles (principal, teacher, student).
  - Separate dashboards for principal, teacher, and student roles.
- **Role:**

- Facilitates interactions between users and the system.
- Allows teachers to upload assignments, students to view assignments, and the principal to access a summary of student counts.

## **2. Application Layer**

- **Components:**

- Backend logic implemented in PHP for session handling, user authentication, and role-based redirection.
- Functions for uploading/viewing assignments and retrieving student/teacher counts.
- APIs to fetch and update data from the database.

- **Role:**

- Processes user requests, validates inputs, and applies business logic.
- Handles CRUD operations for assignments, profiles, and counts.

## **3. Database Layer**

- **Components:**

- MySQL database to store:
  - users table for user credentials and roles.
  - assignments table for uploaded assignments by teachers.
  - classes table for managing class and student information.
- Ensures data integrity and secure handling of passwords and sensitive information.

- **Role:**

- Stores user information, assignments, and class-related details.
- Facilitates data retrieval and updates as required by the application layer.

## **4. System Workflow**

### **1. User Interaction:**

- Students, teachers, and the principal log in to the system using their credentials.
- Teachers upload assignments and view the student count for their class.
- Students view their assignments and profile information.
- The principal accesses a dashboard to see the total student count.

### **2. Request Processing:**

- Inputs (e.g., login details, file uploads) are sent to the application layer for processing.
- Role-based dashboards are rendered using backend logic.

### **3. Data Handling:**

- The application layer interacts with the database to store or retrieve data (e.g., assignments, profiles).
- Real-time updates ensure accurate counts and assignment availability.

### **4. Response Generation:**

- Processed data (e.g., student count, uploaded assignments) is displayed in the user interface dynamically.

## **4.3 ER Diagram**

Entity-Relationship Diagram (ER Diagram):

Below is the ER model representation:

### **1. Entities:**

- User: Contains details for all users (student, teacher, principal).
- Assignment: Stores assignment information uploaded by teachers.
- Class: Maps teachers and students to their respective classes.
- Student Profile: Contains additional details of students (e.g., name, class, email).

### **2. Relationships:**

- A teacher uploads multiple assignments.
- A student belongs to one class but can view multiple assignments.
- A principal monitors multiple classes.

## 4.4 Database Schema

### 1. User Table

| Column   | Data Type     | Description                           |
|----------|---------------|---------------------------------------|
| id       | INT (Primary) | Unique ID for each user.              |
| username | VARCHAR       | Username of the user.                 |
| password | VARCHAR       | Hashed password for security.         |
| role     | ENUM          | Role: student, teacher, or principal. |
| email    | VARCHAR       | Email of the user.                    |

### 2. Assignments Table

| Column     | Data Type     | Description                    |
|------------|---------------|--------------------------------|
| id         | INT (Primary) | Unique ID for each assignment. |
| teacher_id | INT (Foreign) | Links to the users table.      |
| class_id   | INT (Foreign) | Links to the classes table.    |
| title      | VARCHAR       | Title of the assignment.       |
| file_path  | VARCHAR       | Path to the uploaded file.     |
| created_at | TIMESTAMP     | Timestamp of the upload.       |

### 3. Attendance Table

| Column            | Data Type                        | Description                                |
|-------------------|----------------------------------|--------------------------------------------|
| <b>id</b>         | <b>INT (Primary)</b>             | <b>Unique ID for each class.</b>           |
| <b>Student_id</b> | <b>VARCHAR</b>                   | <b>Name of the class (e.g., Class 10).</b> |
| <b>Date</b>       | <b>INT (Foreign)</b>             | <b>Date of attendance</b>                  |
| <b>Status</b>     | <b>enum('present', 'absent')</b> | <b>Status of Attendance</b>                |

#### 4. Student\_Profiles Table

| Column          | Data Type            | Description                        |
|-----------------|----------------------|------------------------------------|
| <b>id</b>       | <b>INT (Primary)</b> | <b>Unique ID for each student.</b> |
| <b>user_id</b>  | <b>INT (Foreign)</b> | <b>Links to the users table.</b>   |
| <b>class_id</b> | <b>INT (Foreign)</b> | <b>Links to the classes table.</b> |
| <b>name</b>     | <b>VARCHAR</b>       | <b>Name of the student.</b>        |
| <b>email</b>    | <b>VARCHAR</b>       | <b>Email of the student.</b>       |

# CHAPTER 5

## UI/UX Design

### 5.1 Screenshot's

## Our History

### Changdev Barku Patil Kople School

A Legacy of Excellence Founded in 1975, Changdev Barku Patil Kople School began as a small initiative by the visionary leader, Shri Changdev Barku Patil, a respected farmer and educator from Kolpewadi village. His dream was to provide quality education to the children of rural communities, ensuring that even the most underprivileged could access learning and knowledge. Early Years: In the early days, the school operated out of a humble two-room setup, with only a handful of students and a few dedicated teachers. Despite limited resources, the commitment to education was unwavering. Shri Changdev believed in the transformative power of knowledge and aimed to blend traditional values with modern learning methods. Growth and Expansion: By the 1980s, the school had gained popularity for its holistic approach to education. Parents from neighboring villages began sending their children to the school, drawn by its reputation for nurturing both academic and moral values. Over time, with support from the local community and government, the school expanded to include more classrooms, a science lab, and a library. In 1995, the school introduced its first computer lab, making it one of the first rural schools in the region to embrace technology. This forward-thinking approach positioned it as a leader in rural education. Educational Philosophy: The school's motto, "गरीब शक्ति" (Knowledge is Power), reflects its belief in the potential of education to uplift individuals and society. The curriculum focuses not only on academic excellence but also on character development, leadership, and community service. Shri Changdev often said, "Education is the greatest gift we can give to our children, for it empowers them to shape their future and the future of our nation." Achievements: Over the decades, the school has produced numerous successful alumni, including engineers, doctors, teachers, and entrepreneurs. Many of these former students continue to give back to the school, contributing to its growth and development. In 2010, the school received the prestigious "Best Rural School Award" from the Maharashtra State Government, recognizing its outstanding contribution to rural education. Present Day: Today, Changdev Barku Patil Kople School stands as a beacon of learning in Kolpewadi. It offers education

## Our Achievements

### Sports Championship Winner

Date: April 20, 2024  
Location: Kolpewadi Sports Ground  
Category: Track and Field  
Group Name: Kople Warriors  
School: Barku Kople School  
Kople Warriors from Barku Kople School emerged as champions in the sports competition held at Kolpewadi Sports Ground, excelling in various track and field events.

### School Play Competition Winner

Date: April 10, 2024  
Location: Kopargau School Auditorium  
Category: Drama  
Group Name: Stars of Kople  
School: Barku Kople School  
Stars of Kople, a talented team from Barku Kople School, won first place in the school play competition held at the Kopargau School Auditorium. Their outstanding performance captivated the judges and audience alike.

### Singing Competition Victory

Date: January 12, 2024  
Location: Nashik Cultural Center  
Category: Solo Singing  
Group Name: Melody Makers  
School: Barku Kople School  
The Melody Makers, representing Barku Kople School, won first place in the solo singing competition at Nashik Cultural Center. Their soulful rendition impressed both judges and the audience.

### Drawing Competition Champion

Date: February 18, 2024  
Location: Niphad Art Gallery  
Category: Visual Arts  
Group Name: Creative Minds  
School: Barku Kople School  
Creative Minds from Barku Kople School won first prize at the drawing competition held in Niphad, with artwork that showcased creativity and skill in capturing nature's beauty.

### Dance Competition Victory

Date: August 18, 2024  
Location: Kolpewadi Temple  
Category: Traditional Dance  
Group Name: The Kople Stars  
School: Barku Kople School  
The Kople Stars, representing Barku Kople School, won first place in the traditional dance competition held at Kolpewadi Temple. Their performance received high praise from the audience and judges for its cultural authenticity and vibrant energy.

### Elocution Competition Winner

Date: March 5, 2024  
Location: Kopargau Town Hall  
Category: Public Speaking  
Group Name: Voice of Kople  
School: Barku Kople School  
Voice of Kople, a team from Barku Kople School, won first place in the elocution competition at Kopargau Town Hall. Their powerful speech captivated the audience.

### Annual Cultural Event

Date: June 5, 2024  
Location: School Auditorium  
Category: Performing Arts  
Our students performed a series of traditional dances, earning recognition for creativity and talent in our annual cultural event.

## Managing Trustee

Shri. Changdev Barku Patil Kople

Managing Trustee, Changdev Barku Patil Kople School Changdev Barku Patil Kople, the esteemed founder and managing trustee of Changdev Barku Patil Kople School, is a visionary leader with deep roots in the village of Kolpewadi. Born into a farming family, he grew up witnessing the challenges faced by rural communities, particularly the lack of access to quality education. Determined to bring change, he dedicated his life to the upliftment of his village through education. Early Life and Inspiration: Born in the late 1940s, Changdev Barku Patil Kople was raised in a humble household that valued hard work and community service. Despite limited educational resources, he excelled in his studies and was always eager to learn. His love for knowledge and strong belief in its transformative power shaped his dream of building a school that would offer educational opportunities to children in rural areas like Kolpewadi. Founding of the School: In 1975, with the support of the local community, Changdev Barku Patil Kople laid the foundation of Changdev Barku Patil Kople School. His vision was to create a place where children could receive a well-rounded education, including both traditional wisdom and modern academic learning. Starting with just a few rooms and a handful of students, the school has grown under his leadership into a renowned institution that serves hundreds of students from nearby villages.

### Principle's Message...

**PRINCIPAL'S DESK**

I am honored to welcome you to Barku Kolpe Vidyalaya, where our commitment is to provide quality education to every child in our village and surrounding communities. As a rural school with a vision for progress, our mission is not only to impart knowledge but also to shape well-rounded individuals rooted in strong moral values and life skills.

Our school is dedicated to cultivating an atmosphere of learning, curiosity, and respect. We believe that education is a journey that shapes both the mind and character of each student. Through a blend of academics, sports, and cultural activities, we aim to foster personal growth and responsibility in our students. Our teachers are deeply committed to each student's success. They work tirelessly to make learning engaging and relevant. We also encourage our students to take part in co-curricular and extracurricular activities, from sports and art to cultural programs, nurturing their interests and broadening their perspectives.

Additionally, we emphasize the importance of family involvement in education. We believe that when families and schools work together, students benefit greatly. Through regular meetings, events, and communication, we ensure that parents are informed and involved in their children's education journey. With the collective efforts of our faculty, staff, and supportive community, we are building a foundation for lifelong learning and preparing our students for a bright future. Thank you for your support and trust in our school. I look forward to a successful and inspiring year for each of our students at Barku Kolpe Vidyalaya.

Regards,

Welcome gaikwad kavita sukdev

Admissions

## Welcome to Our School Admissions

### Admission Information

We are excited to welcome new students to our school! Please read the information below to understand our admission process and what documents are required.

Admissions are open for classes from 1st to 10th grade. We are committed to providing the best education and fostering the growth and development of your child.

### प्रवेश माहिती

आम्हाला आनंद आहे की आपण आमच्या शाळेत नवीन विद्यार्थ्यांचे स्वागत करू इच्छितो! कृपया खालील माहिती वाचा, ज्याद्वारे आपल्याला आमच्या प्रवेश प्रक्रियेबद्दल आणि कोणते कागदपत्रे आवश्यक आहेत हे समजेल.

प्रवेश माहिती: आम्ही सर्व शिक्षण वर्गांसाठी उघडे आहोत. आम्ही आपले सर्व विद्यार्थ्यांना

### Required Documents

Before starting the admission process, please ensure you have the following documents ready:

- Birth Certificate of the student
- Previous school report card
- Aadhaar card or any other ID proof
- Passport-size photographs

### आवश्यक कागदपत्रे

प्रवेश प्रक्रियेला सुरुवात करण्यापूर्वी, कृपया खालील कागदपत्रे तयार आहेत:

- विद्यार्थ्याचा जन्म प्रमाणपत्र
- गेल्या शाळेचा अहवाल पत्र

Home

Student Admission Form

Please fill out the following information.

### 1. Student Details (विद्यार्थी माहिती)

First Name (नाव)

Middle Name (वडिलांचे नाव)

आठनाव

Gender (लिंग)

Male (पुरुष)

Female (स्त्री)

Other (इतर)

Date of Birth (जन्मतारीख)

Caste Category (कास्ट ब्रेण)

Phone Number (फोन नंबर)

Current Address (वर्तमान पत्ता)

## CHAPTER 6

### IMPLEMENTATION

The implementation phase involves developing the features of the school management system based on the designed architecture.

#### 6.1 Modules Description

##### 1. User Authentication Module

- **Purpose:** Ensures secure access for principals, teachers, and students.
- **Features:**
  - Registration: Users can register using a unique username and password.
  - Login system: Credentials are validated using PHP and sessions are managed securely.
  - Role-based access control: Redirects users based on their role (principal, teacher, student).
- **Implementation:**
  - Passwords are encrypted using crypt before storage in the database.
  - PHP sessions track and manage authenticated users.

##### 2. Assignment Management Module

- **Purpose:** Allows teachers to upload assignments and students to view them.
- **Features:**
  - Teachers can upload assignments with titles, descriptions, and files.
  - Students can view assignments specific to their class.
- **Implementation:**
  - Assignments are uploaded via an HTML form and stored in the database with file paths.
  - PHP and SQL queries ensure class-based filtering of assignments.

##### 3. Profile Management Module

- **Purpose:** Enables users to view and update their profiles.

- **Features:**
  - Students and teachers can view/edit their profiles.
  - Principals can view aggregated class or student data.
- **Implementation:**
  - PHP retrieves and updates profile data.
  - Input validation ensures no malicious data entry.

#### 4. Class Management Module

- **Purpose:** Facilitates teachers in managing their class data and viewing student counts.
- **Features:**
  - Teachers can view the number of students in their class.
  - Principals can view the total student count across the institution.
- **Implementation:**
  - PHP queries retrieve student counts and display them in the dashboard.
  - Real-time updates reflect changes in student records.

#### 5. Principal Dashboard Module

- **Purpose:** Provides a summary of student data for the principal.
- **Features:**
  - Displays a table with total students and their respective classes.
  - Accessible only to the principal.
- **Implementation:**
  - PHP generates a dynamic table view using SQL queries to fetch student data.

#### 6. Frontend Interface Module

- **Purpose:** Provides an intuitive and user-friendly interface.
- **Features:**
  - HTML, CSS, and JavaScript for responsive design and dynamic content rendering.
  - Separate dashboards for each role.

- **Implementation:**
  - JavaScript validates inputs and ensures dynamic content updates.
  - CSS ensures consistent styling across devices.

## 7. Backend Processing Module

- **Purpose:** Manages server-side operations and database interactions.
- **Features:**
  - Handles CRUD operations for user profiles, assignments, and student data.
  - Manages session integrity and error logging.
- **Implementation:**
  - PHP scripts validate inputs and perform operations with MySQL.
  - Error-handling mechanisms prevent runtime issues.

## 8. Database Management Module

- **Purpose:** Centralizes data storage for secure and efficient handling.
- **Features:**
  - Stores users, assignments, classes, and student data.
  - Maintains relational integrity and supports efficient queries.
- **Implementation:**
  - Tables include entities like Users, Assignments, Classes, and Profiles.
  - Proper indexing and foreign keys ensure optimized performance.

## 6.2 Testing

The system was rigorously tested for functionality, performance, usability, security, and integration to ensure reliability.

### 5.1 Testing

#### 1. Functionality Testing

- **Purpose:** Ensure the system performs core functions accurately.
- **Test Cases:**

- Login and Role-Based Redirection: Verified all roles access the correct dashboards.
- Assignment Upload/View: Tested teacher uploads and student access.
- Profile Viewing/Editing: Confirmed all roles could view and edit their profiles.
- **Results:** Core functionalities worked as expected with accurate role-based redirection.

## 2. Performance Testing

- **Purpose:** Assess system performance under various loads.
- **Test Scenarios:**
  - High User Load: Simulated simultaneous logins and interactions.
  - Real-Time Updates: Measured performance during assignment uploads and student data updates.
- **Results:** The system handled high loads with consistent response times.

## 3. Usability Testing

- **Purpose:** Evaluate user-friendliness and overall experience.
- **Test Scenarios:**
  - Profile Management: Assessed ease of navigating profile editing interfaces.
  - Assignment Viewing: Verified that students could intuitively locate their assignments.
- **Results:** Users found the system easy to navigate. Minor improvements were made to UI clarity.

## 4. Security Testing

- **Purpose:** Ensure data protection and prevent unauthorized access.
- **Test Scenarios:**
  - Authentication: Tested login mechanisms and session management.
  - SQL Injection and XSS: Evaluated system resilience to common vulnerabilities.
- **Results:** The system passed all security tests, ensuring data confidentiality and integrity.

## 5. Database Performance and Data Integrity

- **Purpose:** Validate data accuracy and database efficiency.
- **Test Scenarios:**
  - Data Load Testing: Simulated concurrent updates to test database performance.
  - Consistency Checks: Verified data integrity during and after updates.
- **Results:** Data consistency was maintained under all scenarios.

## 6. Integration Testing

- **Purpose:** Confirm seamless interaction between components.
- **Test Scenarios:**
  - Frontend and Backend: Verified data flow between user actions and database updates.
  - Role-Based Data Access: Ensured correct data visibility based on roles.
- **Results:** Components interacted flawlessly, and data updates were reflected accurately.

## 7. User Feedback Analysis

- **Purpose:** Gather insights for future improvements.
- **Feedback Areas:**
  - Ease of Use: Users appreciated the intuitive interface and role-specific dashboards.
  - Suggestions: Requests included additional analytics for principals and notification features for students.
- **Results:** Feedback was positive, with suggestions noted for future iterations.

## **CHAPTER 6**

### **RESULT**

We Completed the Website of **Shri Changdev Barku Pa. Kolpe** and about to deploy this website which will help number of students as well as teacher and parents. Students are able to track their attendance and see the assignments. Teachers are able to see their class students and manage their attendance, also they are able to upload assignments.

#### **6.1 Discussions**

##### **1. Ease of Use**

Users found the system's interface intuitive and easy to navigate. The design incorporated simple forms and dashboards for students, teachers, and the principal, making it accessible even to users with limited technical knowledge. Teachers appreciated the straightforward process for uploading assignments, while students found it easy to view assignments and update their profiles. The role-based dashboards ensured that each user could quickly access their specific functionality without unnecessary steps, contributing to a positive overall experience.

##### **2. Responsive and Efficient Interaction**

The system provided real-time interaction and feedback, ensuring efficiency in operations. Teachers could upload assignments with immediate confirmation of successful uploads, and students could view updated assignments in real time. The principal's dashboard dynamically displayed student counts and class data, enabling quick decision-making. The real-time responsiveness of the system minimized delays and improved user satisfaction, especially during peak usage periods.

##### **3. Accurate Assignment and Data Management**

The system excelled in managing and categorizing data accurately. Teachers could upload assignments linked to specific classes, ensuring students only accessed relevant information.

The principal's dashboard displayed precise student counts, segmented by class. These features streamlined the data management process, reducing errors and ensuring accurate records. Additionally, the ability to view profiles and track student or class-specific data contributed to the system's effectiveness in handling institutional operations.

#### **4. Secure User Authentication and Privacy**

Security was a key focus, and the integration of encrypted passwords and session management ensured data safety. Role-based access control restricted data access to authorized users, with principals, teachers, and students only able to view or modify information pertinent to their role. Input validation mechanisms prevented unauthorized access and vulnerabilities such as SQL injection, providing confidence in the system's ability to protect sensitive user information and institutional data.

#### **5. Efficient Data Processing and Retrieval**

The system handled large volumes of data efficiently, ensuring quick response times even as the number of assignments, students, and classes increased. The database architecture was optimized for scalability, enabling seamless operations as more users accessed or modified data. This efficiency was particularly important during activities like bulk student record updates or assignment uploads, where minimal delays significantly enhanced usability.

#### **6. Positive User Feedback**

Feedback from users, including teachers, students, and the principal, was overwhelmingly positive. Teachers highlighted the convenience of uploading assignments directly through the platform, while students appreciated the ability to access assignments and view their profiles without complications. Principals valued the dynamic dashboard that displayed student counts in a structured table format. Many users noted that the system simplified institutional processes and eliminated the need for manual record-keeping. The role-based segregation of tasks ensured users felt in control of their respective functionalities, leading to increased satisfaction with the system.

## CHAPTER 7

### CONCLUSION

In conclusion, our school website for this school is designed with simplicity, accessibility, and functionality in mind. Built using HTML, CSS, and JavaScript for a user-friendly front end, it ensures a seamless browsing experience. The backend, powered by PHP and SQL, enables secure data storage and efficient management of school records. Deploying this website to our school client will enhance communication, streamline information access, and improve the school's digital presence, making it a valuable resource for students, parents, and staff alike.

### FUTURE SCOPE

The School Management System has significant potential for future enhancements to improve user experience and adapt to technological advancements. Below are some areas for potential development:

#### 1. Advanced Analytics and Insights

- **Principal Dashboard Enhancements:** Include detailed analytics, such as attendance trends, assignment completion rates, and performance metrics for students and teachers.
- **Predictive Insights:** Use data analytics to identify struggling students and recommend interventions to teachers and principals.

#### 2. AI-Driven Features

- **AI Chatbot for Assistance:** Implement an AI-powered chatbot to assist students, teachers, and principals with common queries, such as "How to upload assignments?" or "What is the total student count?"
- **Automated Notifications:** Use AI to send reminders about upcoming assignment deadlines, new uploads, or profile updates.

#### 3. Enhanced Assignment Management

- **Multi-File Uploads:** Enable teachers to upload multiple assignment files simultaneously.

- **Feedback Mechanism:** Allow students to submit their assignments through the system and receive feedback directly from teachers.

#### **4. Mobile Application**

- Develop a dedicated mobile app for Android and iOS to improve accessibility.
- Include offline capabilities for students to view assignments and teachers to manage class data.
- Push notifications for real-time updates on assignments and announcements.

#### **5. Integration with External Tools**

- **Learning Management Systems (LMS):** Integrate with popular LMS platforms like Moodle or Google Classroom for a seamless learning experience.
- **Document Management:** Include support for document generation and sharing, such as progress reports or attendance sheets.

#### **6. Multilingual and Accessibility Support**

- Add support for multiple languages to cater to diverse user bases.
- Ensure the system complies with accessibility standards for users with disabilities.

#### **7. Enhanced Security Features**

- Implement multi-factor authentication for added security.
- Use advanced encryption for sensitive data, including assignment files and personal information.
- Add role-based audit logs to track changes and identify potential misuse.

#### **8. Cloud Scalability**

- Move the system to a cloud-based infrastructure to handle increased traffic and data storage efficiently.
- Use cloud services to enable secure and scalable operations during peak usage periods.

## **9. Feedback and Suggestion System**

- Introduce a dedicated module for collecting feedback from students, teachers, and principals.
- Use the feedback to refine the system and prioritize feature enhancements.

## **10. Global Expansion and Collaboration**

- Collaborate with other institutions to create a centralized platform for inter-college activities, such as project sharing or inter-college competitions.
- Enable cross-institution access for joint student-teacher initiatives and resource sharing.
